

Board room with reflective glass surfaces

Corridor separating meeting rooms and open plan space

Open plan office area

Meeting room adjacent to entrance

FWPA provides R&D services to the Australian forest and wood products industry. As a result of a “green” retrofit to their new office, the open plan office space and meeting rooms were too quiet – distracting noise was a problem, as well as speech privacy.

Soundmask Australia installed a system comprising a rack generator and transducers throughout the entire office, offering a cost effective solution to FWPA's sound problems.

In the words of the customer:

“All went very well yesterday – your install team was fantastic – no disruptions and very efficient to boot. System going fine so far – makes a real difference in the office space. Happy customer thus far.”
